January 28, 2016

Dear Parent/Guardian,

At Mott Middle College providing a safe and secure environment that ensures learning for your student is our top priority. As we all continue to navigate the Flint water crisis, Mott Middle College would like to bring you up to date on the following areas:

**Drinking water on campus:**

To ensure quality water throughout the campus, Mott Community College installed Hydration Stations for students and staff to use. The Hydration Stations contain NSF certified filtering that is changed regularly by trained college staff. Students and staff can use the stations, both as a standard water fountain or to fill water bottles.

Given the national attention to the Flint water crisis, and the outpouring of donations, individual water bottles will be delivered to our program regularly for student and staff use.

**Updates and Communication:**

The Genesee Intermediate School District (GISD) will be sending out regular communications to ensure that you have the most up-to-date information on our efforts, in collaboration with Mott Community College. Resources will continue to be added to the GISD website. Please check for updated news and resources at [www.geneseeisid.org](http://www.geneseeisid.org).

We know that some of our students, who use Flint water at home, have already been receiving information about water distribution centers and resources available. If parents or students observe changes in behavior, or physical conditions, please contact your primary care physician.

We continue to rely on guidance from the Genesee County Health Department and the health care community, to keep current with the most impactful practices. We have printed a document from the Health Department for your information. Many valuable resources can be found on the main page of the Genesee County Health Department website at [www.gchd.us](http://www.gchd.us).

Volunteering and donations are being accepted through the American Red Cross.

Again, we are working closely with Mott Community College to ensure all students have quality drinking water.

If you have additional questions, please don't hesitate to call the school office at (810) 232-8530.

Sincerely,

Margaret Green  
Principal
