INTRODUCTION

Genesee Intermediate School District has prepared and distributed an annual statistical information report for use by constituent districts and other interested parties since 1960. We take great pride in providing quality service to our constituent districts, community members and students. Feedback concerning this report is encouraged and welcomed.

It is our hope that this information will be helpful in identifying trends and projections as well as assist with planning for the future. It is important to recognize that data cannot always be used in isolation or without interpretation when attempting to evaluate the overall effectiveness of school programs. In addition, year-to-year comparisons of data are difficult since the state frequently changes procedures and criteria for reporting on the many school business and operational functions. However, long-range trends can be extrapolated to give insight and provide a look into the future.

This report has been prepared by Cynthia McCain, Executive Director, Business Services; Debra Hartman, Administrative Assistant; and Stacy Hodges, Project Specialist. The quality of the report is indicative of their efforts and those of the staff in the Business Services Department at Genesee Intermediate School District. In an effort to provide you with the most current information we will post updates to our Statistical Summary at www.geneseeisd.org (Quick Link – Statistical Data) throughout the year.

Questions concerning material affecting any of the individual districts should be directed to the superintendent's office of the appropriate district. Employees of Genesee Intermediate School District stand ready to answer questions pertaining to the various reports and summaries contained in this document.
